CORRUSION MONITORING SYSTEM

Intrusive Corrosion Monitoring System

Coupon & Probes are commonly used in high/low pressure flow lines, pipes and vessels.

Non-Intrusive Corrosion Monitoring System

Corrosion and Erosion Monitoring Using High Accuracy UT for Subsea, Underground and Aboveground.

VALVE INTERLOCK SYSTEM

When sequence operations are required, with the use of interlocks, operators are forced to operate all valves or other equipment correctly within the interlock sequence, eliminating human error.

INDUSTRIES WE SERVE

- Mining
- Oil and Gas
- Marine and Offshore
- Water and Wastewater
- Petrochemical and Chemical

PROTECTIVE COATINGS

High-performance protective coatings engineered for demanding industrial environments provide exceptional resistance to abrasion, erosion, corrosion, and chemical exposure.

- Metallic-Reinforced Epoxy
- Ceramic-Reinforced Epoxy
- Viscoelastic coatings
- Composite Repair Systems
- Primers

INTERNAL GIRTH WELD SLEEVES

Insertion of sleeves into the pipe at girth weld area to protect the welded joint from internal corrosion and abrasion.

It allows for 100% internally coated pipelines, as sleeves create a continuous, protected surface.

DRY ICE BLASTING / CLEANING

Cleaning of a wide range of surfaces from delicate parts to heavy machinery by dry ice (solid carbon dioxide) pellets. Upon impact, the dry ice sublimates, create no secondary waste.

- Non-Abrasive
- Chemical Free
- Non-Conductive

LUBE OIL FLUSHING & FILTRATION

Lube Oil Flushing activity for large diameter Pipelines, Compressors, Engines & Aeroderivative Gas turbines in Oil & Gas.

3 stages to achieve high purity oils;

- Depth Filtration
- Dehydration
- Degasification

PIPELINE PIGGING SYSTEM

AWTADA provides comprehensive proving, gauging, and progressive cleaning pipeline services to safeguard data integrity & operational reliability. A variety of Cleaning, Dewatering, Displacement, Decoking pigs are available.

CATHODIC PROTECTION SYSTEM

We supply and install the cathodic protection systems (SACP & ICCP) for pipelines, storage tanks, process vessels, offshore facilities, concrete structures etc.
